

Where the adversarial constitution sits

It is 9.73 from the post-edit centroid in the full twelve axes - the most distant document in the study. The left panel cannot show that.

Existing basis, fitted to the 24 seed and post-edit points
PC1 36% + PC2 19%; 35% of its offset is in this plane

Refitted with the adversarial point included
PC1 33% + PC2 20%; 83% of its offset is in this plane

○ seed — one edit ● after one edit ★ attractor ◆ adversarial constitution
