

The edit map, one arrow per document

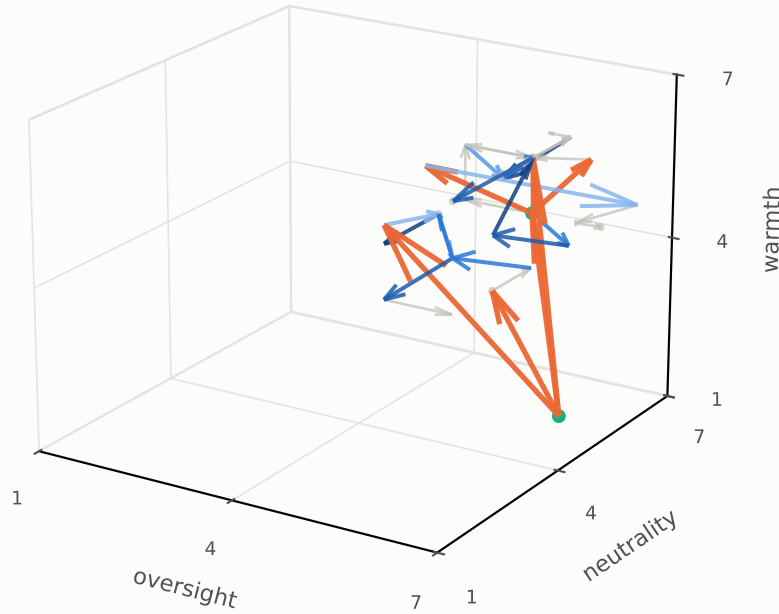

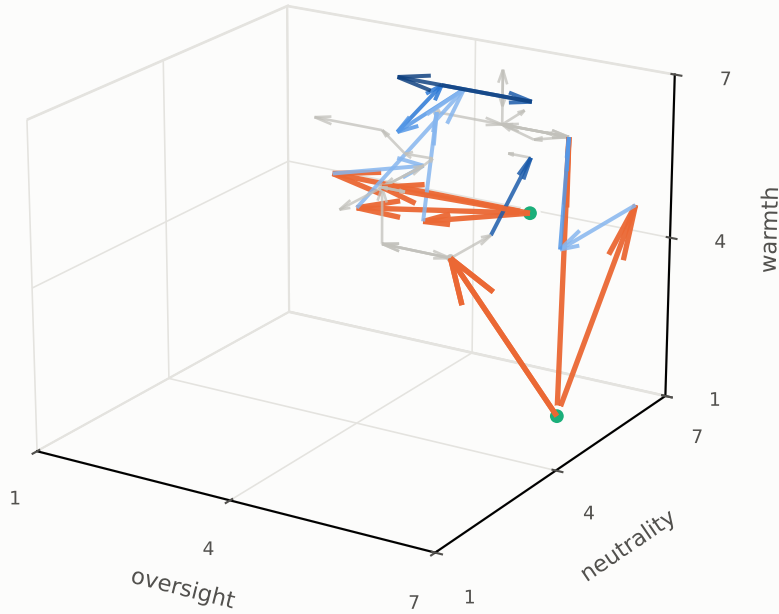

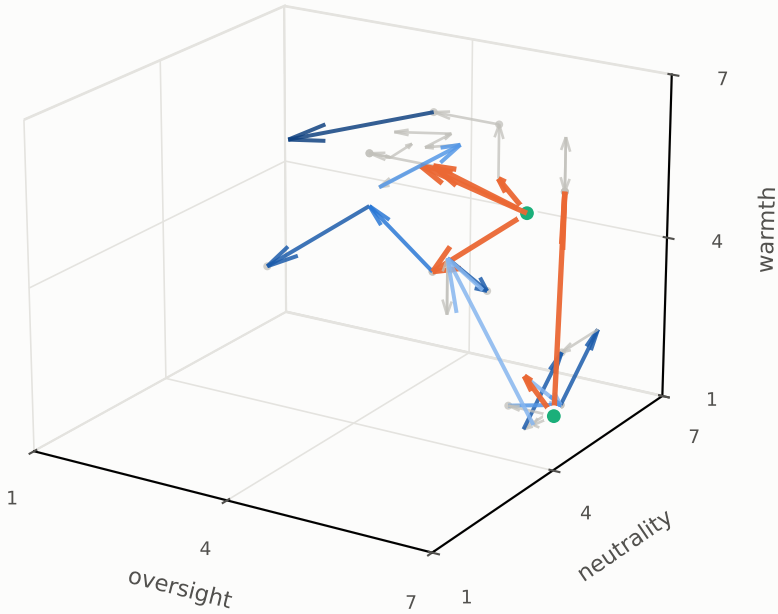

Each arrow runs from a constitution to the one the model submitted after reviewing it. 229 edits, 5 models, seeded from the Anthropic and OpenAI model specs.

Grey = displacement below the 1.16 rater-noise floor on these three axes (140 of 229 edits); at that size the arrow is the judge, not the model.

gemma4_31b 16 of 48 edits above noise

glm53_flash 18 of 48 edits above noise

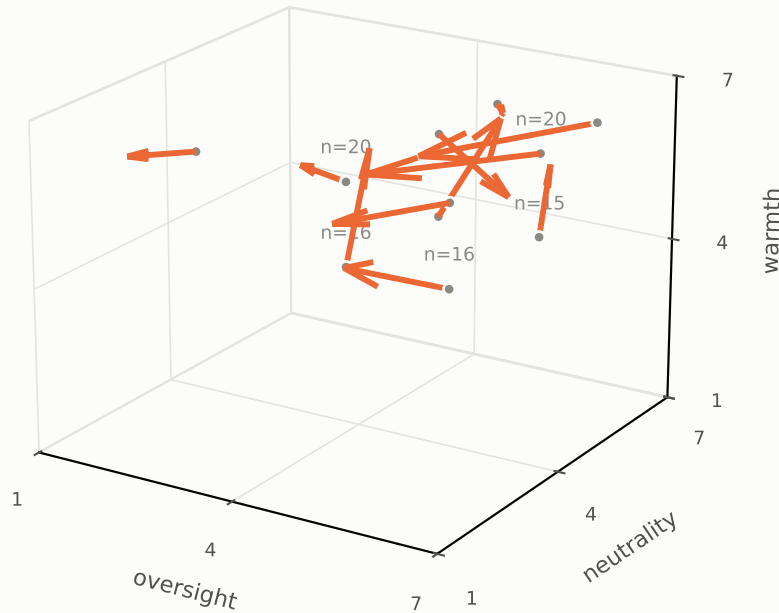

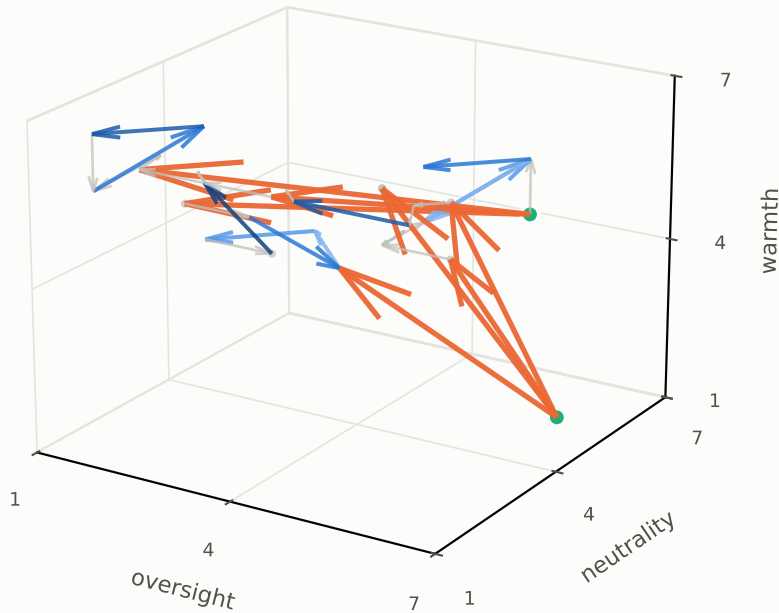

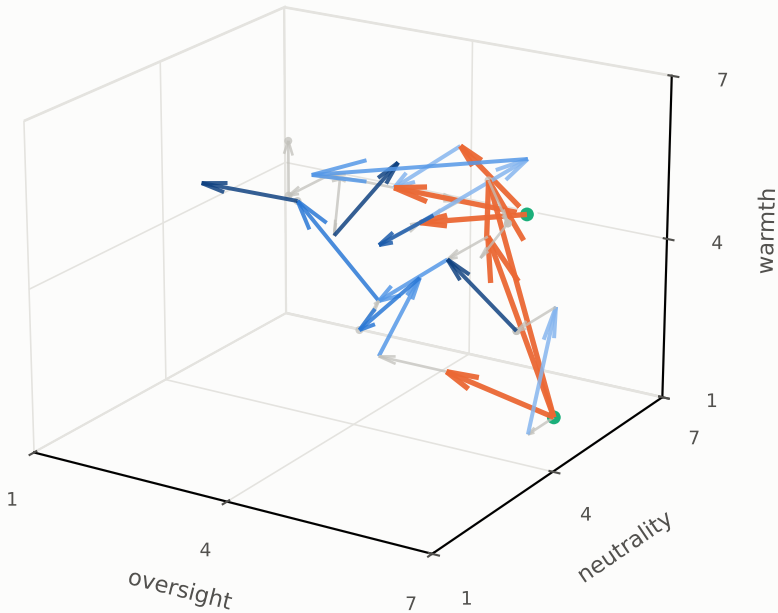

gpt6_luna 20 of 48 edits above noise

qwen35_27b 18 of 42 edits above noise

qwen38_27b 17 of 43 edits above noise

mean of the arrows per region, gens 2-6
11 bins with n>=8 (arrows 5x)

generation 1 (first edit) generation 2 generation 3 generation 4 generation 5 generation 6 within rater noise seed (model spec)
